

SLOWWORM

Meaning: A slowworm is a legless lizard native to Europe, resembling a snake, that is often found in gardens and helps control pest populations.

1. The slowworm is often mistaken for a snake due to its elongated body and lack of limbs.
2. In many gardens across Europe, the slowworm plays a crucial role in controlling pest populations.
3. Unlike most reptiles, the slowworm is completely harmless and poses no threat to humans.
4. During sunny days, you can often spot a slowworm basking on warm stones or soil.
5. Conservation efforts are in place to protect the slowworm's habitat from urban development.
