

SOLIDIFICATION

Meaning: Solidification is the process of a substance changing from a liquid state to a solid state, often through cooling or hardening.

1. The solidification of lava into rock can take thousands of years.
2. Scientists study the process of solidification to understand how different materials behave under varying temperatures.
3. During the solidification phase, the molten metal begins to harden and take shape.
4. The artist used solidification techniques to create a stunning sculpture from molten glass.
5. In chemistry, solidification is a crucial step in the formation of crystalline structures.
