

# SPAVIN

*Meaning: Spavin is a veterinary term referring to a swelling or bony growth in a horse's hock joint, often associated with lameness.*

1. The veterinarian diagnosed the horse with spavin after observing its limping gait.
2. After months of treatment, the spavin in the gelding's hock began to show signs of improvement.
3. Many horse owners are unaware of how spavin can affect their animal's performance in competitions.
4. The trainer adjusted the horse's training regimen to accommodate its spavin and prevent further injury.
5. Understanding spavin is crucial for equestrians who wish to maintain their horse's health and mobility.
