

# SPAWL

*Meaning: Sprawl refers to the uncontrolled expansion of urban areas into surrounding rural land, often resulting in low-density development and increased infrastructure demands.*

1. Urban sprawl has transformed the once-vibrant farmland into a sea of suburban houses.
2. The sprawl of the city has led to increased traffic congestion and environmental concerns.
3. As the population grew, the sprawl extended into neighboring counties, affecting local ecosystems.
4. Many residents lament the sprawl, wishing for a return to more compact and walkable communities.
5. Efforts to combat urban sprawl include promoting public transportation and preserving green spaces.
6. The rapid sprawl of the city has led to a loss of green spaces.
7. As suburbs continue to sprawl outward, traffic congestion becomes a major issue.
8. Urban planners are concerned about the environmental impact of unchecked sprawl.
9. The sprawl of industrial areas has encroached upon residential neighborhoods.
10. Efforts to contain urban sprawl have resulted in new zoning regulations.
11. The sprawl of the city has encroached upon the once-lush countryside.
12. As urban sprawl continues, many natural habitats are being destroyed.
13. The architects designed the buildings to complement the sprawl of the surrounding neighborhood.
14. Efforts to curb suburban sprawl have led to more compact city planning.
15. Residents are concerned about the negative impacts of sprawl on local ecosystems.
