

SPERMATIMUM

Meaning: Spermatium is a non-motile male gamete found in certain algae, involved in the fertilization process.

1. The spermatium plays a crucial role in the reproductive cycle of certain algae.
2. In some species, the spermatium is motile, allowing it to swim toward the egg cell.
3. Researchers have studied the structure of the spermatium to understand its fertilization potential.
4. The formation of a spermatium is a key event in the life cycle of many fungi.
5. Spermatium development is often influenced by environmental factors, such as nutrient availability.
