

SPIKELET

Meaning: A spikelet is a small flower cluster in grasses that typically contains one or more florets and is involved in the plant's reproduction.

1. The spikelet of the grass plant contains multiple florets that contribute to its reproductive success.
2. Botanists often study the arrangement of spikelets to understand the diversity of grass species.
3. During the summer, the fields are filled with spikelets swaying gently in the breeze.
4. Each spikelet is surrounded by bracts that help protect the delicate florets inside.
5. Farmers rely on the health of spikelets to determine the yield of their cereal crops.
