

SPRINGHALT

Meaning: Springhalt is a condition in horses characterized by an abnormal gait, often involving involuntary jerking or twitching of the hind legs.

1. The horse was diagnosed with springhalt after exhibiting an unusual gait during training.
2. Veterinarians explained that springhalt can affect a horse's performance in competitions.
3. After careful observation, the trainer noted the horse's leg would suddenly jerk upward, a classic sign of springhalt.
4. Managing a horse with springhalt requires specialized care and a tailored rehabilitation program.
5. Owners must be diligent in monitoring their horses for signs of springhalt to ensure prompt treatment.
