SPUR-WINGED

Meaning: Spur-winged refers to a type of bird characterized by the presence of spurs on its wings, commonly found in species such as the spur-winged goose and spur-winged lapwing.

1. The spur-winged goose is known for its distinctive wing spurs that help it defend against predators.

2. In the wetlands, the spur-winged lapwing can often be seen foraging for insects among the grasses.

3. Researchers observed the spur-winged plover's unique courtship display during their breeding season.

4. The striking plumage of the spur-winged bird makes it a favorite among wildlife photographers.

5. Conservation efforts are underway to protect the habitats of the spur-winged species from environmental threats.
