

STARLING

Meaning: A starling is a small to medium-sized passerine bird known for its iridescent plumage and social behavior, often found in flocks.

1. The starling's iridescent feathers shimmered in the sunlight as it perched on the fence.
2. A flock of starlings swooped and swirled through the sky, creating a mesmerizing dance.
3. The song of a starling is often described as a delightful mix of whistles and clicks.
4. Despite their noisy demeanor, starlings are considered important for controlling insect populations.
5. During migration, the starling can travel thousands of miles, showcasing its impressive endurance.
