

# STEATOMA

*Meaning: Steatoma is a benign tumor consisting of sebaceous (oil) gland tissue, often resembling a cyst.*

1. A steatoma is often mistaken for a cyst due to its similar appearance.
2. The patient was relieved to learn that the steatoma was benign and required no immediate treatment.
3. Surgical removal of the steatoma can greatly improve the patient's comfort and self-esteem.
4. Doctors often advise monitoring a steatoma closely if it shows no signs of infection or discomfort.
5. Understanding the nature of a steatoma helps in alleviating concerns about its potential complications.
