

STERHYDRAULIC

Meaning: Sterhydraulic refers to a system or technology that utilizes hydraulic principles and mechanisms to enhance performance and efficiency, particularly in vehicles and heavy machinery.

1. The sterhydraulic system in the new model enhances the vehicle's performance on rugged terrain.
2. Engineers are exploring sterhydraulic solutions to improve the efficiency of heavy machinery.
3. The innovative sterhydraulic design reduces energy consumption while maximizing output.
4. Maintenance teams are being trained to handle the complexities of sterhydraulic equipment.
5. With its sterhydraulic capabilities, the robot can maneuver with precision in confined spaces.
