

STOKER

Meaning: A stoker is a person who feeds fuel, such as coal, into a furnace or boiler, particularly in steam engines or ships, to maintain fire and generate steam.

1. The stoker diligently fed coal into the furnace to keep the steam engine running smoothly.
2. In the dim light of the ship's lower deck, the stoker worked tirelessly, his face covered in soot.
3. As the stoker adjusted the firebox, he felt the heat radiating against his skin.
4. With each shovelful of coal, the stoker's muscles strained, but he knew the importance of his role.
5. The crew relied on the stoker's expertise to maintain the ship's speed during their long voyage.
