

STORMGLASS

Meaning: Stormglass: a sealed glass container filled with a chemical solution that changes its appearance in response to atmospheric pressure and temperature, traditionally used as a barometer to predict weather changes.

1. The stormglass on the mantelpiece began to change its appearance, signaling an approaching storm.
2. Curious about the weather predictions, she consulted her antique stormglass that had been passed down through generations.
3. Despite its unpredictability, the stormglass fascinated him with its liquid crystals that shifted with the atmospheric pressure.
4. The sailor relied on his trusty stormglass to determine whether it was safe to venture out to sea.
5. As the evening wore on, the stormglass indicated a brewing tempest, prompting the family to secure their windows.
