

STOVER

Meaning: Stover refers to the leaves, stalks, and husks of cereal plants, especially corn, that are left after harvesting and can be used as fodder or for soil enrichment.

1. The farmer stored the stover in a barn to use as bedding for the livestock.
2. After the corn harvest, the stover was left in the field to enrich the soil.
3. She learned to make delicious silage from the stover to feed the cattle during winter.
4. The stover was a vital resource for preventing soil erosion on the farm.
5. Many farmers use stover as a sustainable option for biomass fuel production.
