

# STRATIFORM

*Meaning: Stratiform refers to a type of cloud or precipitation that is layered, uniform, and typically covers a large area, often resulting in overcast skies.*

1. The stratiform clouds blanketed the sky, creating a uniform gray canvas overhead.
2. Meteorologists observed the stratiform precipitation as it fell steadily throughout the day.
3. In the study of weather patterns, stratiform layers often indicate stable atmospheric conditions.
4. Birdwatchers noted the migration of species beneath the stratiform clouds that loomed above.
5. The artist captured the beauty of the stratiform landscape in her latest painting, highlighting its subtle gradients.
