

SUB-BASS

Meaning: Sub-bass refers to the lowest frequencies of sound, typically below 60 Hz, that provide a deep, resonant foundation in music and audio experiences.

1. The sub-bass frequencies in the song created a powerful foundation that made the entire track feel immersive.
2. During the live performance, the sub-bass thumped through the venue, energizing the crowd with its deep vibrations.
3. Producers often use sub-bass to add depth and richness to electronic music, enhancing the listening experience.
4. Tuning the sub-bass correctly is essential for achieving that punchy sound in hip-hop tracks.
5. Many audiophiles invest in high-quality speakers specifically to enjoy the nuances of sub-bass in their favorite music.
