

SUBINFEUDATION

Meaning: Subinfeudation is the process by which a feudal lord grants a portion of land to a vassal, who can then further grant parts of that land to sub-vassals, thereby establishing a hierarchical structure of landownership.

1. Subinfeudation played a crucial role in the development of feudal systems across medieval Europe.
2. The process of subinfeudation allowed lords to grant lands to vassals, creating a complex hierarchy of landownership.
3. As subinfeudation became more common, it led to an increase in local power among minor nobles.
4. Historians often debate the impacts of subinfeudation on the central authority of monarchies during the Middle Ages.
5. In some regions, subinfeudation resulted in fragmented political power and increased conflict among rival lords.
