SUBJECTIVE

Meaning: Subjective refers to something that is influenced by personal opinions, feelings, and interpretations rather than being based on objective facts.

1. The interpretation of art is often highly subjective, varying from person to person.
2. In a subjective analysis, one's personal opinions and feelings play a crucial role.
3. Her decision to move abroad was based on subjective factors rather than objective data.
4. It's important to recognize that beauty is subjective and can differ across cultures.
5. The subjective nature of happiness means that what brings joy to one individual may not resonate with another.
