

SUBJECTIVITY

Meaning: Subjectivity is the quality of being influenced by personal feelings, opinions, or interpretations rather than objective facts.

1. Subjectivity can often cloud our judgment, making it difficult to see the truth in a situation.
2. The artist's work reflects her deep sense of subjectivity, allowing viewers to interpret each piece in their own way.
3. In discussions about morality, subjectivity plays a crucial role in shaping individual beliefs and values.
4. Philosophers have long debated the implications of subjectivity on our understanding of reality and knowledge.
5. The subjectivity of personal experiences means that two people can perceive the same event in completely different ways.
