

# SUBLIMIFICATION

*Meaning: Sublimification is the process of a substance transitioning directly from a solid state to a gaseous state without passing through the liquid phase.*

1. Sublimification of the solid ice into vapor occurs under specific atmospheric conditions.
2. In chemistry class, we learned about the process of sublimification and its applications in various industries.
3. The artist's work often reflects a sublimification of raw emotions into beautiful visual forms.
4. Through sublimification, the material transitioned directly from a solid to a gas, bypassing the liquid phase entirely.
5. Her dedication to sublimification in her writing transformed mundane experiences into profound insights.
