

SUBSISTENT

Meaning: Subsistent refers to a mode of living that meets basic survival needs, typically through self-sufficient practices such as farming or fishing.

1. The subsistent population relied on fishing and farming to meet their basic needs.
2. In discussions about sustainable development, the concept of subsistent living is often emphasized.
3. Many rural communities operate on a subsistent economy, focusing on self-sufficiency rather than profit.
4. The subsistent lifestyle that some tribes maintain is a testament to their adaptation to the environment.
5. While urban areas thrive on industrial growth, subsistent practices are still vital for many indigenous cultures.
