

SUBSTITUTION

Meaning: Substitution is the act of replacing one element, ingredient, or variable with another in a particular context or system.

1. The substitution of sugar with honey in the recipe enhanced its flavor.
2. In mathematics, substitution is often used to solve complex equations.
3. The team faced challenges when they had to make a last-minute substitution during the game.
4. His substitution of traditional methods with modern technology improved productivity.
5. Substitution can sometimes lead to unexpected results in scientific experiments.
