

# SUCCUSSATION

*Meaning: Succussion refers to the sound produced by the movement of fluid in the body, often detected during a medical examination, particularly in the lungs.*

1. The sound of succussion was evident as the doctor examined the patient's lungs.
2. In some cases, succussion can indicate the presence of fluid in the pleural cavity.
3. Medical students were taught to recognize succussion as a key sign during their training.
4. The physician noted the distinct succussion while performing a physical examination.
5. After the diagnosis, the nurse explained the significance of succussion to the concerned family.
