

SUINT

Meaning: Suint is the natural grease or lanolin found in sheep's wool that can be removed during the washing process to enhance the wool's quality and softness.

1. Suint is a term often used in the wool industry to describe the natural grease found in sheep's wool.
2. The process of washing suint from raw wool can significantly improve its quality and softness.
3. Farmers must consider the presence of suint when preparing fleece for market, as it affects the weight and value.
4. In traditional sheep shearing, suint can create a slick surface that makes handling the fleece more challenging.
5. Understanding how to manage suint is essential for anyone involved in the production of wool textiles.
