SULPHINIC

Meaning: 'Sulphinic' refers to a class of compounds or acids containing the functional group -SO2H, often involved in organic synthesis and serving as intermediates in chemical processes such as dye and pharmaceutical production.

1. The chemist explained the unique properties of sulphinic acids in organic synthesis.
2. Sulphinic compounds can serve as important intermediates in the production of dyes and pharmaceuticals.
3. In the lab, we observed the reaction between sulphinic anhydride and aromatic compounds.
4. The researchers published a paper detailing the environmental impact of sulphinic pollutants.
5. Understanding the behavior of sulphinic salts is crucial for developing effective chemical processes.
