

SUPERCRESCENT

Meaning: Supercrescent refers to the phase of the moon when it appears as a slender crescent, typically just after the new moon, characterized by a thin, illuminated arc.

1. The supercrescent moon hung low in the sky, casting a delicate silver glow over the landscape.
2. Artists often find inspiration in the supercrescent phase, as it offers a unique perspective of lunar illumination.
3. During the supercrescent stage, the moon appears as a slender arc, captivating stargazers with its beauty.
4. As the evening progressed, the supercrescent shape became more pronounced, drawing attention from all who were outside.
5. The supercrescent is a fleeting sight, making it a special occasion for photographers and night sky enthusiasts alike.
