

# SWIFTLET

*Meaning: A swiftlet is a small, agile bird belonging to the family Apodidae, known for its ability to construct nests from its own saliva, often valued as a delicacy in certain cuisines.*

1. The swiftlet is known for its unique ability to build nests entirely made of saliva.
2. In many Southeast Asian countries, swiftlet nests are considered a delicacy and are harvested for bird's nest soup.
3. These small birds are remarkable fliers, often seen darting through the air in search of insects.
4. The acoustic calls of the swiftlet echo in the caverns where they roost, creating a symphony of sounds.
5. Conservation efforts are critical for preserving swiftlet habitats, as urban development threatens their natural nesting sites.
