

SYNERGISM

Meaning: Synergism is the interaction or cooperation of two or more agents, elements, or disciplines that produces a combined effect greater than the sum of their individual effects.

1. The innovative project thrived on the principle of synergism, bringing together diverse talents to create something extraordinary.
2. In the field of science, synergism can lead to breakthroughs that would be impossible for any single discipline to achieve alone.
3. The marketing team experienced synergism when they collaborated with the creative department, resulting in a successful campaign.
4. Understanding the value of synergism can help organizations maximize their resources and enhance productivity.
5. The synergism between the two companies not only improved their products but also strengthened their market position.
