SYRINGOTOME

Meaning: A syringotome is a surgical instrument used for extracting tissue samples, particularly from lesions or for diagnosing skin conditions.

1. The surgeon used a syringotome to carefully extract tissue samples from the patient's lesion.
2. In veterinary medicine, a syringotome is often employed to diagnose skin conditions in animals.
3. The design of the syringotome allows for precision when performing biopsies in delicate areas.
4. After the procedure, the doctor explained how the syringotome minimizes trauma to surrounding tissues.
5. Innovations in medical technology have led to the development of more advanced syringotomes for better patient outcomes.
