

# SYSTEMIC

*Meaning: Systemic refers to something that affects or relates to an entire system, particularly in a way that is fundamental and pervasive rather than isolated or superficial.*

1. The researchers identified a systemic issue within the healthcare system that needed immediate attention.
2. Her approach to management emphasized the importance of systemic change rather than superficial fixes.
3. The educational reform aimed to address systemic inequalities that disadvantaged certain groups of students.
4. Environmentalists argue that the effects of climate change are systemic and require comprehensive policy responses.
5. To tackle poverty effectively, we must understand its systemic roots and not just treat its symptoms.
