

TALPA

Meaning: Talpa refers to a genus of burrowing mammals commonly known as moles, characterized by their cylindrical bodies, velvety fur, and specialized adaptations for digging and living underground.

1. The talpa scurried through the garden, leaving little mounds of dirt in its wake.
2. Scientists studied the talpa's unique adaptations for life underground.
3. As the sun set, the talpa emerged briefly to forage for insects.
4. In folklore, the talpa was often depicted as a clever trickster of the earth.
5. The talpa's velvety fur helps it navigate the dark tunnels it calls home.
