

TELEMETROGRAPH

Meaning: A telemetrograph is an instrument that measures and records distances with high precision, often used in tracking and satellite technology.

1. The telemetrograph captured the satellite's movement with remarkable precision.
2. Engineers relied on the telemetrograph to ensure accurate distance measurements in their experiments.
3. During the launch, the telemetrograph provided real-time data on the spacecraft's trajectory.
4. Researchers developed a new model of the telemetrograph to improve its sensitivity and range.
5. The telemetrograph became an essential tool in the field of remote sensing and geospatial analysis.
