

TENERAL

Meaning: TENERAL (adjective): referring to the stage in an insect's life, particularly after molting, when it is newly emerged, soft, and not yet fully hardened or developed.

1. The teneral stage of the dragonfly is crucial for its development.
2. After molting, the butterfly emerged in a teneral state, its wings still soft and crumpled.
3. Teneral insects often exhibit bright colors that fade as they mature.
4. In the teneral phase, many species are particularly vulnerable to predators.
5. Observing a teneral grasshopper can be a rare and exciting experience for entomologists.
