

TENTACULUM

Meaning: Tentaculum: a slender, flexible appendage, often resembling a tentacle, used by certain animals, such as octopuses and mythical sea creatures, for grasping or manipulating objects.

1. The octopus extended its tentaculum to grasp the rock in its path.
2. In ancient mythology, the sea monster was often depicted with a massive tentaculum.
3. Scientists studied the structure of the tentaculum to understand its role in locomotion.
4. The jellyfish's tentaculum floated gracefully in the water, capturing unsuspecting prey.
5. Each tentaculum of the squid was equipped with specialized suckers for better grip.
