

# TERSULPHIDE

*Meaning: Tersulphide refers to a chemical compound containing three sulfur atoms, often used in reactions and industrial applications for enhancing material properties.*

1. The chemist carefully measured the amount of tersulphide required for the reaction.
2. In industrial applications, tersulphide compounds can enhance the durability of certain materials.
3. Researchers are exploring the potential uses of tersulphide in the field of nanotechnology.
4. The stability of tersulphide at high temperatures makes it suitable for various chemical processes.
5. Safety precautions are essential when handling tersulphide due to its reactive nature.
