

THEISM

Meaning: Theism is the belief in the existence of a divine being or beings that actively engage with and influence the universe.

1. Theism posits the existence of a divine being who actively interacts with the universe.
2. Many philosophers have debated the implications of theism on moral values and ethics.
3. In contrast to atheism, theism asserts that belief in God is essential for a meaningful life.
4. Theism can be found in various religions, each presenting unique interpretations of the divine.
5. The rise of secularism has led some to question the relevance of theism in modern society.
