

TOP-DRAINING

Meaning: Top-draining refers to a system or feature designed to direct water away from a surface or area from the top, preventing accumulation and facilitating effective drainage.

1. Top-draining systems are essential for preventing water accumulation in low-lying areas.
2. The architect designed the roof with a top-draining feature to enhance rainwater management.
3. In our garden, we prefer soil that is top-draining to avoid issues with root rot.
4. The top-draining reservoir allowed for efficient water flow and minimized flooding risks.
5. When selecting a pot for your plants, make sure it has a top-draining design for better aeration.
