

TOPGALLANT

Meaning: Topgallant refers to a sail set above the uppermost sail on a mast or the section of the mast itself that supports this sail, typically used in sailing ships.

1. The topgallant sail billowed majestically in the brisk wind as the ship sailed into the sunset.
2. The crew climbed to the topgallant to secure the rigging before the storm hit.
3. During the race, the captain ordered the topgallant to be unfurled for maximum speed.
4. The ship's topgallant flag fluttered proudly, signaling her impressive height.
5. As the vessel heeled over, the topgallant was nearly submerged by the crashing waves.
6. The topgallant sail billowed majestically in the strong wind as the ship raced across the open sea.
7. He climbed up the rigging to adjust the topgallant, feeling the thrill of height beneath his feet.
8. As the storm approached, the crew decided to lower the topgallant to avoid damage to the sails.
9. In the age of tall ships, the topgallant was essential for gaining extra speed and maneuverability.
10. The captain proudly pointed out the intricate knots used to secure the topgallant as a sign of skilled seamanship.
