

TRANSHIPMENT

Meaning: Transshipment is the process of transferring goods from one mode of transport to another, often involving a change of vessels, typically at a port.

1. Transshipment of goods often leads to delays in delivery times.
2. The port facility specializes in the transshipment of containers from one ship to another.
3. Effective transshipment processes can significantly reduce shipping costs for international trade.
4. During the transshipment phase, cargo is reloaded onto different vessels for continued transport.
5. Companies must carefully manage transshipment logistics to ensure smooth operations.
