

TRANSMISSIBLE

Meaning: Transmissible: capable of being transmitted or spread from one individual or organism to another, particularly in the context of infectious diseases.

1. The virus is highly transmissible among unvaccinated populations.
2. Understanding the transmissible nature of the disease is crucial for public health measures.
3. Researchers are studying how transmissible the new strain of the virus is compared to earlier variants.
4. Some diseases are not transmissible between species, which limits their spread.
5. Effective communication can be as transmissible as any viral infection, spreading ideas rapidly.
