

TRANSMITTIBLE

Meaning: Transmittible: capable of being transmitted or spread from one individual or source to another, particularly in the context of diseases or infections.

1. The virus is highly transmissible, but fortunately, it is not easily transmittible through casual contact.
2. Certain diseases are transmittible through water, highlighting the importance of sanitation.
3. In some cases, the symptoms of the illness are not transmittible, making it easier to manage outbreaks.
4. Researchers are studying how the transmittible nature of the bacteria can be controlled in crowded environments.
5. Vaccination can reduce the risk of developing conditions that are otherwise transmittible to others.
