

TRAWLNET

Meaning: A trawlnet is a large, bag-shaped fishing net that is dragged along the sea floor to catch fish and other marine creatures.

1. The fishermen deployed the trawlnet to catch large quantities of shrimp in the deep sea.
2. After several hours of dragging the trawlnet, they returned to shore with an impressive haul of fish.
3. Using a trawlnet allows researchers to sample fish populations effectively in various marine environments.
4. The old trawlnet had several holes, which reduced its efficiency in capturing smaller species.
5. During the demonstration, the students learned how to inspect and repair a trawlnet for optimal use.
