

TRIBUTARY

Meaning: A tributary is a smaller river or stream that flows into a larger river or body of water.

1. The river's tributary contributed a significant amount of water to the main flow during the rainy season.
2. Many small streams act as tributaries, feeding into the larger river that winds through the valley.
3. In geography class, we learned how tributaries can affect the ecosystems around them.
4. The tributary was home to various species of fish, making it a popular spot for local anglers.
5. During the hike, we came across a beautiful tributary that cascaded into the larger river below.
6. The river is fed by several smaller tributaries that enhance its flow.
7. Scientists studied the tributary to understand its impact on the local ecosystem.
8. During the rainy season, the tributary swells, merging with the main river.
9. Many fish species rely on the tributary for breeding grounds and shelter.
10. The map clearly indicates the tributary's path through the dense forest.
