

TRIFOLIUM

Meaning: Trifolium is a genus of flowering plants in the legume family, commonly known as clovers, which are often used for their ecological benefits and as a food source for pollinators.

1. The garden was adorned with vibrant clusters of trifolium, attracting pollinators from all around.
2. Farmers often plant trifolium as a cover crop to improve soil health and fertility.
3. In traditional herbal medicine, trifolium is sometimes used for its potential anti-inflammatory properties.
4. The distinctive three-leaved structure of trifolium makes it easily recognizable in the wild.
5. Children delighted in finding four-leaf clovers among the trifolium in the sunny meadow.
