

TURBIDITY

Meaning: Turbidity is the measure of the cloudiness or haziness of a liquid, caused by suspended particles, often used to evaluate water quality.

1. The turbidity of the river increased significantly after the heavy rainfall.
2. Scientists measure turbidity to assess the water quality in lakes and streams.
3. High turbidity levels can be detrimental to aquatic life by blocking sunlight.
4. The clear waters of the lagoon were a stark contrast to the turbidity of the nearby estuary.
5. Monitoring turbidity is crucial for ensuring safe drinking water in urban areas.
