

TURBIDNESS

Meaning: Turbidity is the quality of being cloudy or opaque due to the presence of suspended particles in a liquid.

1. The turbidity of the river water made it difficult to see the fish swimming beneath the surface.
2. After the heavy rain, the lake exhibited a noticeable turbidity that obscured its once-clear depths.
3. In scientific studies, measuring the turbidity of a liquid can provide insights into its quality and purity.
4. The turbidity in the aquarium water indicated a problem with the filtration system that needed immediate attention.
5. Tourists often remarked on the turbidity of the ocean waters after a storm, contrasting sharply with the usual clarity.
