

TYPHOAN

Meaning: Typhoon: a tropical cyclone characterized by strong winds and heavy rain, typically occurring in the western Pacific region.

1. The typhoon made landfall with unprecedented force, causing widespread devastation across the coastal towns.
2. Residents were urged to evacuate as the typhoon approached, bringing heavy rains and fierce winds.
3. Emergency services prepared for the worst as meteorologists predicted the typhoon would intensify before reaching shore.
4. After the typhoon passed, communities came together to rebuild and support those affected by the destruction.
5. The government deployed aid to the hardest-hit regions in the aftermath of the typhoon, focusing on restoring essential services.
