

UMBELLAR

Meaning: Umbellar refers to a structure resembling an umbrella, often used to describe the arrangement of certain plant parts, such as flowers or leaves, that radiate from a central point.

1. The umbellar structure of the flower made it particularly attractive to pollinators.
2. Scientists studied the umbellar formation to understand how it influences water drainage in plants.
3. The umbellar shape of the jellyfish allowed it to move gracefully through the water.
4. Her artwork captured the delicate umbellar patterns of the ferns in the forest.
5. In botany, the term umbellar refers to a flower cluster that resembles an umbrella in shape.
