

# UNDERDITCH

*Meaning: Underditch: a low-lying area or ditch, often muddy, typically found in natural settings such as forests or hiking trails.*

1. The hikers carefully navigated through the underditch, avoiding the muddy patches left by the recent rain.
2. Amidst the dense foliage, they discovered an ancient stone path leading to the underditch.
3. The underditch served as a natural drainage system, preventing floods in the nearby village.
4. Birds often nested in the underditch, taking advantage of the moisture and shelter it provided.
5. As the sun set, the shimmering water in the underditch reflected the hues of the evening sky.
