

UNDERSATURATED

Meaning: Undersaturated refers to a solution or mixture that contains less of a solute than it can potentially hold, resulting in a lower concentration than what is required for saturation.

1. The solution was undersaturated with the dye, resulting in a much lighter color than expected.
2. In the experiment, the undersaturated mixture failed to produce the desired reaction.
3. Geologists discovered that the undersaturated soil could not support the weight of the new structure.
4. The artist intentionally used undersaturated colors to evoke a sense of nostalgia in her painting.
5. Due to the undersaturated state of the air, the humidity levels were unusually low that day.
